

NEF152/20140127/1

SODIUM DNA

DESCRIPTION

It reduces free radicals caused by the exposure to UVA radiation. It also increases endogenous hyaluronic acid by inhibition of the hyaluronidase. It can be used in the treatment of localized fine wrinkles and facial sagging due to migration of subcutaneous fats.

%	ACTIVE INGREDIENTS	FUNTIONS
3	SODIUM DNA	Regenerates the skin, increases cell proliferation and elasticity, repairs tissues, improves the appearance of the skin by filling in wrinkles, prevents capillary alterations and damage caused by UV and photo-aging, and so on.
